

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

1-9. (cancelled)

10. (new) A transceiver for use in a wireless network device that operates in a communication system that includes a radio network, the transceiver comprising:

a radio unit configured to communicate with the radio network;

wherein the transceiver is operable to enable the wireless network device to participate as a master device on the radio network.

11. (new) The transceiver of claim 10 wherein the communication system further comprises a main communication network and wherein the transceiver is capable of communicating with the main communication network.

12. (new) The transceiver of claim 11 further comprising a processor operable to control the communications of the radio unit with the radio network and capable of communicating with the main communication network.

13. (new) The transceiver of claim 11 wherein the wireless network device is operable to participate as a slave on the main communication network.

14. (new) The transceiver of claim 11 wherein the main communication network comprises a wired communication network.

15. (new) The transceiver of claim 11 wherein the main communication network comprises a wireless communication network.

16. (new) The transceiver of claim 10 wherein the transceiver comprises an integrated circuit.

17. (new) The transceiver of claim 10 wherein the wireless network device is sized to be held by a user.

18. (new) A transceiver for use in a mobile network device that operates in a communication system that includes a radio network, the transceiver comprising:

a radio unit configured to communicate with the radio network;

wherein the transceiver is operable to enable the mobile network device to participate as a master device on the radio network.

19. (new) The transceiver of claim 18 wherein the communication system further comprises a main communication network and wherein the transceiver is capable of communicating with the main communication network.

20. (new) The transceiver of claim 19 further comprising a processor operable to control the communications of the radio unit with the radio network and capable of communicating with the main communication network.

21. (new) The transceiver of claim 19 wherein the mobile network device is operable to participate as a slave on the main communication network.

22. (new) The transceiver of claim 19 wherein the main communication network comprises a wired communication network.

23. (new) The transceiver of claim 19 wherein the main communication network comprises a wireless communication network.

24. (new) The transceiver of claim 18 wherein the transceiver comprises an integrated circuit.
25. (new) The transceiver of claim 18 wherein the mobile network device is sized to be held by a user.
